The InDesign
Hidden Character Typeface

S A M P L E S

Sample Characters

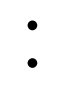

1. Space characters (proportional width)

Most InDesign space characters can be redesigned. The InDesign Hidden typeface make them “printable” using their GUI markers and preserving their own width for the following code points. (The other space characters cannot be overridden so you will only find them in the private use area — *see next pages.*)

						
00A0	2002	2003	2004	2005	2006	2007
						
2008	2009	200A	202F	205F	3000
